UJJOL DHAR **M| 22 | +91 7317873701 | ujjolforwork@gmail.com**

EDUCATION

Year	Course	Institution	Curriculum	Performance
2022 - 2025	BBA(Analytics & Big Data)	UPES, Dehradun	NEP	7.48 CGPA
2021 - 2022	Class XII	Saint John's Academy, Prayagraj (Science)	ISC	65.00 %
2019 - 2020	Class X	Saint John's Academy, Prayagraj	ICSE	86.80 %

- Achieved **state and national-level ranks** in International Olympiads consistently ranking within the **top 1,000–3,000 students nationally**
- Earned **A+ in 10 subjects & O grades in 7 core Analytics & Big Data subjects**, with **SGPA improving to 8.58 in advanced semesters**

INTERNSHIPS

Sales & Inventory Data Analyst Intern | The Leather Story *(D2C lifestyle & leather goods brand)* *(24 weeks) May'25-Nov'25*

Data Cleaning	• Cleaned and consolidated 1,000+ sales records using Excel, standardizing SKU, date, and revenue fields for analysis
Dashboarding	• Built Power BI dashboards analyzing product-wise and time-based sales trends, identifying high-performing SKUs
Forecasting	• Performed trend-based sales forecasting to support inventory planning and short-term marketing decisions

Data Analyst Intern | Outlook Media *(National media & publishing brand)* *(6 weeks) June'24-July'24*

Visualization	• Built 5+ Power BI dashboards tracking subscription trends, circulation metrics, and revenue performance
Trend Analysis	• Analysed historical sales & subscription data, performing trend-line analysis to forecast demand and seasonality
Business Insights	• Delivered actionable insights supporting marketing optimization & inventory planning, improving growth drivers

PROJECTS UNDERTAKEN

Rooftop Solar Savings Estimator | Household & MSME

- Built a rooftop solar savings model estimating **long-term cost savings** based on system size, consumption, and tariff structures
- Performed **scenario-based analysis** comparing grid electricity costs with rooftop solar adoption over multiple time horizons
- Incorporated factors such as installation cost, payback period, and energy offset to **evaluate financial feasibility**
- Delivered actionable insights enabling households and small businesses to make informed renewable energy investment decisions

Amazon Customer Behavior & Product Preference Analysis (Dissertation)

- Analysed **50,000+ customer reviews** from Amazon's electronics category to study buying behavior, product pref., and satisfaction drivers
- Performed **sentiment analysis and statistical correlation** (price vs. rating, r ~ 0.07), showing satisfaction driven by features over discounts
- Executed **customer segmentation** identifying **~73% low spenders** and high-spender niches to support targeted marketing strategies
- Generated **actionable business recommendations** including cross-selling opportunities, feature-based positioning, and pricing optimization

Weather Prediction System | Predictive Analytics & Web Deployment

- Developed a **weather prediction model** forecasting key parameters such as temperature, humidity, and rainfall using historical climate data
- Processed and analysed **10,000+ historical weather records**, applying data cleaning, feature engineering, and train–test validation
- Integrated the predictive model into a **live web application**, enabling real-time weather insights through an interactive user interface
- Achieved **~85% prediction accuracy** by optimizing model parameters and validating performance across multiple weather conditions

Assistive Communication System for the Hearing & Speech Impaired | Hand Gesture Recognition & Speech Recognition

- Developed an **assistive communication system** combining hand gesture recognition and **speech-to-text conversion** for user-accessibility
- Implemented a **CNN-based gesture recognition model** classifying **5+ hand gestures** from live webcam input with high accuracy
- Built a **speech recognition pipeline** converting **real-time audio (~10 sec)** into text using deep learning for automation
- Achieved **~90% gesture accuracy** and reliable speech transcription, enabling bidirectional human–computer interaction

Coffee Price Prediction Model | Time Series & Forecasting Analytics

- Developed a **commodity price prediction model** to forecast coffee prices using historical market data for analysis
- Analysed **multi-year pricing datasets**, applying feature engineering, trend analysis, and regression modelling for improved accuracy
- Achieved **~85% forecasting accuracy**, generating insights to support pricing strategy and market trend evaluation for businesses

POSITION OF RESPONSIBILITY

Co-Founder | DIGET Society, UPES (Student-Led Analytics & Technology Society) *July'23 - Present*

- Co-founded DIGET, establishing the society's **vision, structure, and long-term roadmap** for analytics and technology initiatives
- Led cross-functional coordination across **design, content, and operations teams**, ensuring consistent branding and execution
- Oversaw planning and execution of **multiple student engagement initiatives**, workshops, and digital campaigns

Board Member – Graphics Vertical | DIGET Society, UPES *August'24 – May'25*

- Headed the Graphics vertical, managing visual identity and creative standards across all society initiatives with consistent excellence
- Mentored junior designers, coordinating timely delivery of creatives for events, promotions, and collaborations through guidance
- Worked closely with marketing and event teams to enhance digital reach and audience engagement across multiple platforms

EXTRA CURRICULAR ACHEIVEMENTS

Technical Skills	**Microsoft**	**BI & Visualisation**	**Programming Languages**
	Excel, PowerPoint, Word	Power BI, SQL	Python, R, Java
Competitions	• **Runner-Up** at the inter-college Marketing Conclave event, competing against teams from **20+ colleges**		
Social Volunteering: *Shuruaat Ek Jyoti Shiksha Ki*	• Designed marketing creatives and learning materials to enhance NGO outreach, improving student engagement, community visibility, and participation across multiple awareness initiatives and events • Trained students in social media usage and digital communication, enabling them to independently create, manage, and promote educational content while strengthening their confidence and online outreach skills		
Music	• Vocalist with experience in school and university-level performances
